Weekly Market Commentary

April 10, 2017

The Markets

U.S. stock markets are sending mixed signals.

If you look at the performance of the CBOE Volatility Index (a.k.a. the VIX or fear gauge), which is a measure of market expectations for volatility in the near future, it appears all is well and investors expect no unexpected events. *Barron's* explained:

“...which brings us back to a central fact: the absence of volatility. The first quarter was historic for the CBOE Volatility Index...It ranged from 10.6 to 13.1, and its average level was 11.69, the lowest in an initial quarter since the VIX was born in 1990 and the second-lowest quarterly average since the 11.3 of 2006's final three months...”

The VIX remained stubbornly low last week, too, despite weaker than expected employment news, wage news, and generally flat economic data.

If you turn your eyes to the number of companies whose shares have reached new highs, you might form a different opinion about the steadiness of stock markets. *Barron's* wrote:

“...the squadron of stocks pushing 52-week highs at the New York Stock Exchange has shrunk from 338 on March 1 to 72 late last week...But, if the planet really is enjoying a synchronized economic recovery, why are we lunging at these stocks as if they were the only game in town?”

It's difficult to know how to factor in last week's air strikes against Syria, which registered as a tiny blip on the U.S. stock market radar. Some analysts say that's as it should be. The real drivers of market performance in 2017 will be tax reform and global monetary policy. Others are concerned involvement in Syria could lead to a reshuffling of political priorities and delay progress on domestic legislation.

In times like these, diversification is critical.

Data as of 4/7/17	1-Week	Y-T-D	1-Year	3-Year	5-Year	10-Year
Standard & Poor's 500 (Domestic Stocks)	-0.3%	5.2%	15.4%	8.5%	11.3%	5.0%
Dow Jones Global ex-U.S.	-0.4	7.0	13.2	-1.4	2.8	-1.2
10-year Treasury Note (Yield Only)	2.4	NA	1.7	2.7	2.0	4.7
Gold (per ounce)	1.7	9.3	2.0	-0.8	-5.1	6.5
Bloomberg Commodity Index	0.6	-1.9	10.8	-13.9	-9.5	-6.7
DJ Equity All REIT Total Return Index	0.9	3.5	7.3	10.7	11.0	4.9

S&P 500, Dow Jones Global ex-US, Gold, Bloomberg Commodity Index returns exclude reinvested dividends (gold does not pay a dividend) and the three-, five-, and 10-year returns are annualized; the DJ Equity All REIT Total Return Index does include reinvested dividends and the three-, five-, and 10-year returns are annualized; and the 10-year Treasury Note is simply the yield at the close of the day on each of the historical time periods.

PULLING INK OUT OF THE AIR. Air pollution is one of the biggest environmental and human health threats in the world, according to a *2016 World Health Organization report*:

“To date, air pollution – both ambient (outdoor) and household (indoor) – is the biggest environmental risk to health, carrying responsibility for about one in every nine deaths annually. Ambient (outdoor) air pollution alone kills around 3 million people each year...Air pollution continues to rise at an alarming rate and affects economies and people's quality of life; it is a public health emergency.”

Engineer Anirudh Sharma was familiar with the problem. The MIT Media Lab student was walking down a street in Mumbai, reported *MSN.com*, when he noticed that diesel exhaust from passing buses and cars was staining his clothes black.

The experience sparked an idea: Was it possible to recycle air pollution and use it to make something useful? Like ink?

During the past few years, Sharma has developed technology to create the world's first line of art supplies derived from air pollution. He and his team have built an exhaust filter that captures carbon soot as it is emitted from cars, generators, and ferries. Once pollution has been gathered, impurities are removed. The remaining soot is ground into pigment and mixed with vegetable oil to create inks, markers, and paints.

One artist commented, “I don't know if it's the pollution, but the quality of the ink is really special...It's pitch black, really thick and dries incredibly quickly.”

Last month, the first Clean Air Gallery opened in London. It features work by artists from London, Glasgow, Leeds, Southampton, and Nottingham – some of the most polluted cities in the United Kingdom – using Sharma's ink. Other exhibitions are expected to open in Berlin, Singapore, and New York.

Weekly Focus – Think About It

“A mind which really lays hold of a subject is not easily detached from it.”

--Ida Tarbell, Investigative journalism pioneer

* This newsletter was prepared by Peak Advisor Alliance. Peak Advisor Alliance is not affiliated with the named broker/dealer.

* Government bonds and Treasury Bills are guaranteed by the U.S. government as to the timely payment of principal and interest and, if held to maturity, offer a fixed rate of return and fixed principal value. However, the value of fund shares is not guaranteed and will fluctuate.

* Corporate bonds are considered higher risk than government bonds but normally offer a higher yield and are subject to market, interest rate and credit risk as well as additional risks based on the quality of issuer coupon rate, price, yield, maturity, and redemption features.

* The Standard & Poor's 500 (S&P 500) is an unmanaged group of securities considered to be representative of the stock market in general. You cannot invest directly in this index.

* All indices referenced are unmanaged. Unmanaged index returns do not reflect fees, expenses, or sales charges. Index performance is not indicative of the performance of any investment.

* The Dow Jones Global ex-U.S. Index covers approximately 95% of the market capitalization of the 45 developed and emerging countries included in the Index.

* The 10-year Treasury Note represents debt owed by the United States Treasury to the public. Since the U.S. Government is seen as a risk-free borrower, investors use the 10-year Treasury Note as a benchmark for the long-term bond market.

* Gold represents the afternoon gold price as reported by the London Bullion Market Association. The gold price is set twice daily by the London Gold Fixing Company at 10:30 and 15:00 and is expressed in U.S. dollars per fine troy ounce.

* The Bloomberg Commodity Index is designed to be a highly liquid and diversified benchmark for the commodity futures market. The Index is composed of futures contracts on 19 physical commodities and was launched on July 14, 1998.

* The DJ Equity All REIT Total Return Index measures the total return performance of the equity subcategory of the Real Estate Investment Trust (REIT) industry as calculated by Dow Jones.

* Yahoo! Finance is the source for any reference to the performance of an index between two specific periods.

* Opinions expressed are subject to change without notice and are not intended as investment advice or to predict future performance.

* Economic forecasts set forth may not develop as predicted and there can be no guarantee that strategies promoted will be successful.

* Past performance does not guarantee future results. Investing involves risk, including loss of principal.

* You cannot invest directly in an index.

* Consult your financial professional before making any investment decision.

* Stock investing involves risk including loss of principal.
